FERCAM

Logistics & Transport

Our Environmental Policy

FERCAM considers environmental safeguarding to be one of its primary objectives and a crucial factor in its development.

As a logistics company located in the heart of a breathtakingly beautiful mountain area, we are aware of the great responsibility we bear towards the environment, nature and civil society.

We are also convinced that economic development in the future belongs not to those who have access to resources but to those who can use those resources most efficiently.

Today, we are turning our values into a clear-cut commitment to handle our business in a way that is respectful of the environment and strive towards the continuous improvement of our environmental efficiency.

At FERCAM headquarters in Bolzano, we are calling on our employees, suppliers and clients to join forces in curbing and reducing our impact on the environment.

In order to implement our vision of environmental safeguarding we have identified and developed the following principles:

- *setting up, spreading and improving an Environmental Management System compliant with current laws and flanked by a Quality Management System to carry out the following:*
 - *measuring, evaluating and checking, to the maximum extent possible, any business-related environmental damage in order to prevent pollution or, should that prove impossible, to reduce the emission of pollutants to an absolute minimum;*
 - *analysing and optimising energy and raw material consumption, increasing the use of recyclable materials, promoting waste management policies aimed at reduction and reuse*
 - *providing clients, the general public and the institutions with information about the environment;*
 - *ensuring strict compliance with environmental legislation.*

Bolzano, March 1st 2003

*Managing Director
Mr. Thomas Baumgartner*
